

CONSULTING+TESTING+TRAINING+CERTIFICATION

THE SUM THAT MAKES THE DIFFERENCE

ICIM Group is a holding company that, through several companies, offers companies certification, training, consultancy and testing services: integrated solutions to increase the competitiveness of companies on global markets, to grow business with a view to innovation and sustainability, and to provide the market with safe and compliant products.

In the ICIM Group, the sum of the competences of its subsidiaries - ICIM Spa, ICIM Consulting, OMECO and TIFQlab - makes the difference in terms of responding to companies: a single multi-service interlocutor that, thanks to the experience of its professionals, is able to satisfy every business need with consolidated and innovative elements.

The ICIM Group's activities and solutions are aimed at the main manufacturing sectors: mechanics, thermo-hydraulics, automotive, industrial plants of all types (chemical, petrochemical, thermoelectric, nuclear), pressure equipment, heating and lifting, transport, medical devices, medical gases, components, construction industry, energy production and distribution.

The competencies cover all topics of technical and legislative compliance: sustainability, circular economy, digital and ecological transition, Industry 4.0, IT security, business continuity, asset management, health and safety, research and development, internationalisation, professional skills, training, inclusiveness and gender equality, and many more.
